

Ring Size Measurement Table

- To avoid error, please make sure the lines on the right is 2 centimeter long.
- Use 100% printing scale for this page and do not reduce or enlarge the size.

Please follow the three measurements below and repeatedly confirm to find the wooden wring size most suitable for you.

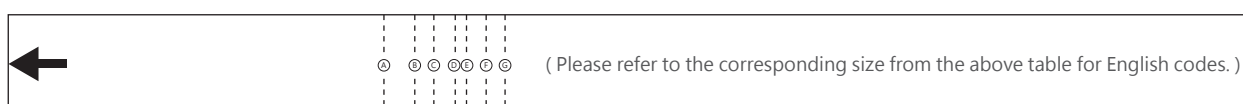

Method 1 Confirm corresponding ring size

Measure by personal experience or professional ring-size measurement device. After you have obtained the correct size, find the corresponding size of wooden ring from the table.

Size of wooden ring (diameter)	US size	Japanese Ring size	國際圍
Ⓐ 15.5mm	4 $\frac{3}{4}$	8 $\frac{2}{3}$	9
Ⓑ 16.8mm	6 $\frac{1}{4}$	12 $\frac{1}{2}$	11
Ⓒ 17.6mm	7 $\frac{1}{4}$	14 $\frac{1}{2}$	13
Ⓓ 18.5mm	8 $\frac{1}{2}$	17	15
Ⓔ 19.0mm	9	18	16
Ⓕ 19.8mm	10	20	17
Ⓖ 20.6mm	11	23	19

Method 2 Simple ring size measurement device A

- Use a knife blade and ruler to cut down the rectangular strips below.
- Circle the long strip around the finger and have the English letter facing upward.
- Align the side pointed by the direction of arrow with the diameter line of ring size for your finger. Follow the table to find your size.
- Due to the arc-shape design of the inner ring, pull tight the strip to make measurement.

Method 3 Simple ring size measurement device B

- Use a knife blade and ruler to cut down the rectangular strips below.
- Choose the appropriate diameter of circle and fold twice along the broken lines of the circle.
- Use scissors to cut along the folded circle and flatten the rectangular strip, confirm the size according to the holes made.
